TECHNICAL RULES ON IMPORTATION AND USAGE OF WIRELESS NETWORK SIGNAL BOOSTER

1. Pursuant to Section 17 and Section 55 of the Telecommunications Promulgation 2008, the Telecommunications Authority of Fiji (Authority) hereby make this technical rule relating to importation and usage of Wireless Network Signal Booster, known to amplify frequencies for licenced wireless and mobile telecommunications service operator and providers.

2. Licenced wireless and mobile telecommunications service operator and providers who are assigned with frequencies under the Regulation of National Spectrum Decree 2009, are allowed to import and use Wireless Network Signal Booster to amplify its respective assigned frequencies, in order to improve its respective wireless and mobile network capacity and integrity.

3. Personal importation and usage of Wireless Network Signal Booster is restricted, as this has caused inundate harmful and unwanted radio frequency interference to licenced wireless and mobile telecommunications service networks, which have adversely disrupted the providing of licenced wireless and mobile telecommunications services.

4. For cases that overwhelmingly require community usage of Wireless Network Signal Booster, importation is allowed provided that the importer must obtain prior agreement and approval of the wireless and mobile telecommunications service network operator and provider that the importer intends to amplify its wireless signal (frequencies), to use and amplify its frequencies without altering the licenced services.
